

Information for patients

Dear Patient,

in most cases you get referred to Dr. Bachners surgery by your general dentist for surgical treatment e.g. wisdom- teeth surgery, alveolar-ridge augmentation or implant procedures.

After the treatment in our office the further treatment will be done at your dentist (e.g. regular check ups, putting crowns and bridges/dentures on the placed implants).

During all surgical procedures and the whole post surgery treatment, the team of Dr. Bachners will be taking care of you, if necessary you will even get provided with a mobile phone number for occurring emergencies.

Before the surgery we would like to get to know you and your medical history, to give you all the information you need regarding the planned operation.

All treatments can also be done under general anesthesia, the general anesthesia will be provided by experienced and well trained anesthesiologists, if you would like to get more information don't hesitate to ask.

If you should have any other questions, contact us via phone or e-mail.
